# Welcome

Since you are holding this guide and reading these words, we're trusting you with our very identity: our brand.

We aren't interested in all of the buzzwords and catchphrases and marketing jargon surrounding the word brand. But we do care about what people think about us. We care about our reputation. We care about building great relationships.

We also care about growing our organization. But, for us, it's not all about numbers. We are passionate about the impact we can make — about empowering the world through coaching.

The following pages are full of guidelines, rules, and handy tips that we hope will help you communicate our values, realize our vision, and reinforce our brand.

It is impossible to predict every situation, brand execution, or implementation, but this guide will help refine your approach.

Whether you are a new staff member, an ICF Chapter Leader, a strategic partner, or one of our amazing vendors, thank you for helping us achieve our goals and pursue our mission.

*Welcome to the ICF family.*

# Intent of This Guide

This style guide is a reference for our staff, Chapter Leaders, vendors, and others who are authorized to work with the ICF brand.

Our intent with this guide is not to restrict creativity and innovation: far from it. We believe in innovation and creative spirit.

What we strive for is a coordinated, consistent and effective brand presence in everything we create. If we make something, we want to make sure that people know where it came from.

While some of our brand executions and graphics have been standardized—like business cards, letterhead, and envelopes—these are not intended as the focus of this guide.

Instead, the focus of this guide is to empower you with the elements you

need to create. By utilizing these tools, resources, and adhering to the guidelines within, you'll make things that look like the ICF brand, every time.

Please refer back to this guide often. We believe that our style guide is a living document. It should evolve over time, just as our brand inevitably will.

If you have any questions concerning the content of this guide, please don't hesitate to reach out to our Marketing and Communications team at [icfpr@coachingfederation.org](mailto:icfpr@coachingfederation.org).

005

For legal, copyright, or usage questions relating to our brand visuals, please reach out to the ICF Marketing and Communications team at [icfpr@coachingfederation.org](mailto:icfpr@coachingfederation.org).

# Using Our Brand Materials

We are reasonable people—and open to most things—but when it comes to our brand, our reputation, we maintain strict control. We hold ourselves to incredibly high standards, and we expect the same wherever our brand is represented.

You must have specific permission and authorization to use any of our brand materials, including any resources, graphics, or visual elements found within this guide and its accompanying files. Simply being in possession of these materials does not imply or imbue permission in any way.

The approval process for materials and implementations of our brand will vary. Please contact an authorized ICF representative (usually your point of contact) with questions.

We reserve the right to disapprove or deny any use or uses of our logo, our brand visuals, or other brand elements at any time, for any reason.

**Questions?** Contact us at [icfpr@coachingfederation.org](mailto:icfpr@coachingfederation.org).

# Approvals

This guide is not a comprehensive list of rules. We recognize the creative journey is full of twists and turns. New approaches, new trends, and changes in technology will inevitably have an effect on our brand and the way we execute it visually.

That said, we insist that any brand execution follow the guidelines listed within. Anything outside of these guidelines must be approved by an authorized representative from the ICF Marketing Team.

Outside approvals may be submitted electronically by emailing the concept to [icfpr@coachingfederation.org](mailto:icfpr@coachingfederation.org).

If you are a vendor working on one of our brand executions, we require an electronic or physical proof before any item is printed, published, or otherwise executed. These proofs can be submitted to your point of contact within ICF.

Questions prevent mishaps: If you have a question about the use of our brand materials, please do not hesitate to ask!

## VISION STATEMENT

Coaching is an integral part of a thriving society and every ICF Member represents the highest quality of professional coaching.

## MISSION STATEMENT

The International Coaching Federation (ICF) exists to lead the global advancement of the coaching profession.

009

# Empowering coaches since 1995.

ICF was founded in 1995 by Thomas Leonard, for the purpose of having a space for all coaches to support one another and help grow the profession. The following year, the first issue of ICF Coaching News was sent to approximately 400 subscribers.

Fast-forward a few decades, and ICF is the world's largest organization of professionally trained coaches, with more than 35,000 members in 146 countries and territories. Together, we are pursuing a powerful vision: ensuring that coaching

is an integral part of a thriving society and that every ICF Member represents the highest quality of professional coaching.

In 2020, ICF celebrated 25 years of serving the coaching profession. That same year, we changed our name from the International Coach Federation to the International Coaching Federation, and transitioned from a single organization to a federation of six family organizations:

- ICF Professional Coaches
- ICF Credentials and Standards
- ICF Coach Training
- ICF Foundation
- ICF Coaching in Organizations
- ICF Thought Leadership Institute

As coaching continues to grow worldwide, ICF will continue to evolve to meet the needs of coaches, coaching clients, our communities and the world.

ICON-ONLY

International Coaching Federation

WORDMARK ONLY

# A Scalable Identity

Trying to fit the same mark simultaneously on a billboard and on the side of an ink pen is a challenge. Our identity system is designed for flexibility, consistency, and brand recognition.

Instead of trying to fit a logo into a space that is too small, use a different version for maximum visual impact and clarity.

When using the icon-only mark, ensure that our brand name is visible near or in relationship with the icon. This will help reinforce our brand recognition across multiple touch points.

The Wordmark is only to be used in small, narrow spaces when the ICF brand mark does not fit.

025

# Horizontal Lockup

The brand logo identifies the ICF brand as a whole. Use this logo to represent the overarching ICF organization.

The horizontal lockup should be used whenever possible.

This logo is a carefully created piece of locked artwork that should not be altered in any way.

026

# Lockup Assembly

When our icon and wordmark are assembled together, the height of our wordmark can be used to determine the ratio and relationship between the two elements.

## SEPARATION

The space between the icon and wordmark is equal to the height of the "C" in the wordmark.

## ALIGNMENT

The baselines of the ICF "Icon" and the full wordmark should align.

## CLEAR SPACE

At a minimum, there should be clear space equal to the height of a capital letter "C" from the wordmark on all four sides of the logo.

## MINIMUM SIZE

This version is not intended for extremely small sizes. The minimum height is .75" for print applications and 50px for digital applications.

027

# Color Variations

Each brand logo lockup has several color variations for use on different background types, tones, and colors.

When in doubt, use the most legible version of the logo for the available background.

For printed executions, special care should be given to ensure logo legibility on the final media or material used.

## Full Color

## Single Color, Dark

Solid ICF Blue

## Single Color, Light

028

# Stacked Lockup

Designed specifically to be vertically efficient, the stacked lockup is a perfect fit for taller areas.

While we generally prefer the full horizontal logo, there are no specific restrictions that would prevent this version from use.

International  
Coaching  
Federation

#### LOCKUP ASSEMBLY

The icon and wordmark is left-aligned and separated by the height of a letter C.

#### CLEAR SPACE

At a minimum, there should be clear space equal to the height of a capital letter "C" from the wordmark on all four sides of the logo.

#### MINIMUM SIZE

This version is not intended for extremely small sizes. The minimum height is 1.5" for print applications and 100px for digital applications.

029

# Icon-Only Lockup

When subtlety is desired, the ICF icon can be used in place of a full brand logo lockup.

When this mark is used, ensure that our brand name is visible near or in relationship with the icon. This will help reinforce brand recognition.

## SPECIAL COLOR USAGE

When the icon is used as a standalone element, it will accommodate any acceptable combination of our colors.

.75" or 50px

## MINIMUM SIZE

At small sizes, ensure the line weight is legible and that the negative spaces do not close. The minimum height is .75" for print and 50px for digital applications.

030

# Background Control

Contrast is the name of the game when considering placing the logo on any background.

Our logo should not only be legible; it should also make a clear, strong statement when used. If there is not enough contrast between the logo and the background, the presence of the logo is weakened.

The logo may be placed on photographs, textures, and patterns as long as there is enough contrast for the logo to be visible.

**Questions?** Contact us at [icfpr@coachingfederation.org](mailto:icfpr@coachingfederation.org).

Use the one-color blue logo on top of light photographs. Do not use the two-color version on photographs.

The one-color white version of the logo may be used on any dark photographic background. Do not use the two-color version on photographs.

The one-color blue version of the logo may be used on any light colored gradients or backgrounds.

The one-color version of the logo may be used on any dark colored gradients or backgrounds.

# Common Errors

Do not stretch, squash, skew, or distort the logo in any way.

Do not edit the logo color, use an off-brand color, or reduce the logo opacity.

Do not add graphic effects to the logo, including drop shadows.

Do not place the logo on a high-contrast pattern or busy photograph.

Do not change the layout or relationship between logo elements.

Do not encroach on the required clear space surrounding the logo.

Note: This is not a comprehensive list of errors. These are simply the most common or egregious errors.

**Questions?** Contact us at [icfpr@coachingfederation.org](mailto:icfpr@coachingfederation.org).

# File Types

The files provided with this guide generally fall into two types: raster and vector files. While both can be used for most applications, typically one is more suited, depending on the usage intent.

## Raster Files

Raster files are comprised of a grid of pixels. These types of files always have a set resolution and size. Once you increase the size past its predetermined size, the quality decreases. You've probably seen this before: images begin to appear pixel-lated if they're pushed too far.

Graphics, like the brand logo, can be exported in raster versions. Photographs are always raster files.

Raster files are typically used for web graphics and digital executions. When used in print applications, you must ensure that the file exceeds the minimum DPI (dots per inch) of 150DPI, or risk a low-quality print.

Typically, raster files end with .jpg, .png, .gif, and .psd. They are easy to open and apply.

## Vector files

Vector files create their shapes by mathematical equations between anchor points. Since they are crafted by ratios, and not a grid of colored squares, vector images can be infinitely scaled.

Graphics, like the brand logo, are typically created as vector files. Illustrations, iconography, and graphic elements are created as vector files.

The limitations of vector files lie in their strengths: because each relationship is an equation, complex items, gradients, photographs often make vector file sizes too large. Raster images are more efficient in those situations.

Vector files are typically used for printing or producing the logo or other graphics in most forms. If you're ever asked for a high-resolution logo file, send a vector file.

Typically, vector files end with .ai, .eps and .svg. Without special programs, these files will be difficult to open but are often perfect to submit to vendors.

# ICF Family Organization Logos

*ICF is one  
family – we  
are One ICF.*

Each family organization utilizes a distinct color gradient in the ICF icon in addition to their wordmark.

It is vital that our logos are presented correctly in every execution. This section covers these guidelines in detail.

that would disparage ICF or its products or services. Neither the logo nor the ICF name may be used in any other company name, product name, service name, domain name, website title, publication title, or the like. Non-ICF materials should not mimic any ICF advertising, product packaging, or website design.

# Background Control

Contrast is the name of the game when considering placing the logo on any background.

Our logo should not only be legible; it should also make a clear, strong statement when used.

If there is not enough contrast between the logo and the background, the presence of the logo is weakened.

The logo may be placed on photographs, textures, and patterns as long as there is enough contrast for the logo to be visible.

The full color version of the logo may be used on approved, light solid-color backgrounds.

The one-color, light version of the logo may be used on any dark photographic background. Do not use the two-color version on photographs.

The one-color blue version of the logo may be used on any light photographic background. Do not use the two-color version on photographs.

The one-color white version of the logo may be used on the ICF Professional Coaches blue gradient.

# Using Tints

We prefer our brand colors used without editing, but some situations require the use of color tints, especially on the web. For example, when a user hovers over a button on our web site, using a tint change can help confirm their action.

If necessary, use a 20% tint step system, keeping legibility in mind. Any tint below 60% used as a background will require dark text.

We prefer to not use the ICF Blue in tints to maintain integrity of the primary brand color.

# Approved Pairings

Nearly all of the colors within our primary palette can be used in combination. Whenever possible, strive for legibility with contrast, especially when setting typography.

White text and icon on a solid ICF Blue background. Perfect for use in print, and web.

White Text and icon on a Dark Blue background. Great contrast and legibility.

White Text and icon on ICF Gold background. Slightly lower contrast.

Blue text and icon on a light gray background.

Blue text and icon on White. Classic combination and great contrast, without use of black.

Blue text and Gold gradient icon on White. The pop of gold draws attention and visual interest.

Blue text and Gold gradient icon on a very light colored background.

White text and icon on a dark gray background.

# Common Errors

Everyone should be able to read what we write and see what we make. Color contrast is vital to ensure an accessible execution.

Do not place the ICF Blue on the Dark Blue and/or dark grey tones. Not enough contrast.

Do not combine the ICF Gold and Yellow. The values are too close together to be legible.

Do not use black and white unless the final output is black and white.

Do not set important text in the Family Organization colors on top of the ICF Blue. The contrast ratio is too low.

Do not change or adjust our colors in any way. Consistency in color is vital to brand recognition.

Do not use tints as primary colors. They should be reserved for effects and secondary tones in illustration.

Do not use off-brand colors, especially in combination with approved brand colors.

Do not use the gradient "C" with the white wordmark.

# Typography

*We are obsessed  
with the beauty of  
typography.*

Few things communicate the look and feel of a brand more clearly than the way letters, numbers, and symbols are put together. We believe typography should strike a balance between legibility and interest.

This section will cover approved typefaces, the way we use typography to communicate clearly, and some helpful usage tips.

**Using Type**

# Montserrat

The typeface we chose for all brand executions.

**Sans-serif**

The old posters and signs in the traditional Montserrat neighborhood of Buenos Aires inspired Julieta Ulanovsky to design this typeface and rescue the beauty of urban typography that emerged in the first half of the twentieth century.

It is available for download at: [fonts.google.com/specimen/Montserrat](https://fonts.google.com/specimen/Montserrat)

#### ACCEPTABLE ALTERNATIVES

---

Montserrat should be used for every brand execution. However, we recognize in some circumstances it is not realistic to use custom fonts. In which case, system default sans-serif fonts should be used: Alternatives include Proxima Nova, Helvetica and Arial, respectively.

# Weights

Montserrat is a variable-weight typeface, which means you are able to customize weights and angles to create an infinite number of weights. That being said, we typically stay within these four weights.

Use contrast between heavy and lighter weights to communicate relative importance, otherwise known as hierarchy, of information.

# Lora

For special occasions  
and circumstances.

Lora is a well-balanced contemporary serif with roots in calligraphy. It is a text typeface with moderate contrast well suited for body text.

Lora can be used as body copy text or as a heading text when looking for a more friendly and lighthearted feel.

# Using Type

## The Six Type Commandments

When constructing layouts, these tips will help you build dynamic, interesting, and on-brand compositions with typography.

While these rules are proven and sound, sometimes breaking them is the right call.

### 01

---

#### Stay Left-Aligned, Rag Right

Legibility and clarity are vitally important to great typographical layouts. Since most people read from left to right, we should align our type accordingly.

### 03

---

#### Align X-Heights or Baselines

Whenever you place text next to each other, either align the baselines (the line that the bottom of a lowercase x sits on) or align the x-heights (the top of a lowercase x). This helps align each line visually.

### 05

---

#### Give Things Space, If Needed

Negative space, or the space around elements is vitally important. That being said, if informational elements belong together, move them closer together. Use grouping wisely: just try not to cram too many things in one space!

### 02

---

#### Skip Weights & Double Size

Contrast is the name of the game when it comes to great design. When in doubt, skip a weight when pairing two weights, and double the size between two text elements.

### 04

---

#### Watch The Rag

When setting paragraphs, keep an eye on the right (ragged) edge. If the rag unintentionally creates a recognizable shape, consider tweaking the language or resizing the container. Also, try to prevent single-word lines (orphans).

### 06

---

#### Keep Line Length Reasonable

It is easy for the user to get lost in long lines of text, and short ones are easily ignored. It's best to keep lines between 45 and 70 characters long, depending on the size of the font. This will ensure legibility as the font sizes increase or decrease.

# Common Errors

## Oh, Goodness, No...

Omnimus cuscilit que ea volesto et, sitatur minum rae. Et expel inctae rerum ea que omnima consedit maio

Do not use unauthorized fonts or typefaces. The only exception is stylized graphics for events or illustrations on a case-by-case basis.

## No t good, nope.

Omnimus cuscilit que ea volesto et, sitatur minum rae. Et expel inctae rerum ea que omnima consedit malo con et venimaxim col epe liguunt. vor opo quam s, duos intiusciate sitas millabo rexcita tiissimus

Keep tracking, kerning, and leading reasonable and legible. Do not stray far from the examples in this guide.

## Not For Us

Omnimus cuscilit que ea volesto et, sitatur minum rae. Et expel inctae rerum ea que omnima consedit

Do not use completely justified alignment for multi-line text.

## Help me

Note: This is not a comprehensive list of errors. It is simply the most common or egregious.

Do not stretch, squish, or otherwise mangle typography. Use the appropriate weight instead.

## Too Much Stroke

Omnimus cuscilit que ea volesto et, sitatur minum rae. Et expel inctae

Do not use a stroke or outline on typography. Also avoid using a drop shadow on typography at all costs.

## I'm Falling!

Omnimus cuscilit que ea volesto et, sitatur minum rae. Et expel inctae

Do not use typography on any angle other than 0° or 90°. Our typography should always read up if 90°.

# Photography

*Photographs:  
worth more than  
1,000 words.*

Photography is vital to the success of our brand and should be treated as an essential part of our brand executions.

In this section, you will find guidelines on photographic composition, content, tone, and usage. Standardizing these facets of photography will ensure a consistent look and feel across our entire image library.

**Tone**

PAGE 090

**People**

# Tone

## Inspiring

Brand photographs should feel clean, fresh, and dynamic. We strive to use an inspirational tone.

The content of each photograph should convey our brand values, reflect our stakeholders in the best light, express each family organization's unique qualities, and above all, empower and inspire.

Always seek excellent lighting that provides contrast between highlights and shadows, even if the light source is simply an open window.

We also strive to incorporate diversity and inclusivity within our photography as much as possible. We also prefer real people over stock photography whenever possible to create a feeling of authenticity. However, stock may be used when high quality photography is not available.

090

# Composition

## Dynamic & Intriguing

When composing a shot, use the foreground and background to ignite visual interest and curiosity.

Consider partially obscuring the subject with an object in the foreground. Or obscuring an otherwise dull background with a very shallow depth of field.

Using lighting effects like interesting concealing shadows and bright highlights can also create an interesting effect that draws the eye.

091

# People

## Photographing People

People are the heart of our brand and should be treated with the highest respect during all shoots.

In general, you should avoid capturing identifying features of customers, unless they have signed a release prior to the shoot.

Whenever a person is the subject of a photograph, they should look relaxed, happy, and engaged. In order for the subject to appear natural, try to capture them “in the moment” instead of posing them. As a general rule, do not have them look directly into the camera lens.

## Business Cards

Business cards are reserved for ICF staff and board members, and are printed on an as-needed basis. In order to reduce our carbon footprint, do not produce business cards if they are not needed for day-to-day use.

Content on all business cards should follow the included template: nothing should be added or removed.

Designs have been created for each individual family organization.
